3. Workflow .....	7
4. Future .....	8
Appendix 1 – List of content providers .....	9

## 1. Introduction

During the first 18 months of the project, WP6 delivered 110,730 audio items for harvesting by Europeana. During the second part of the project, aggregation effort continued and a total of 1,103 data providers have delivered 345,713 objects to the Audio Aggregation Platform. These objects form 1,499 collections within the AAP (as at October 10 2011).

Currently 212,190 objects have been ingested by Europeana. These objects consist of 203,825 audio objects, 6,692 texts, 1,614 images and 12 videos. The harvest of the remainder is scheduled to take place during October and harvested content will be visible via Europeana in November. The total amount of harvested data is expected to total 345,713 objects.

Statistical details of content delivered by the AAP and already fully ingested by Europeana can be found at the following Europeana URL:

[http://www.europeana.eu/portal/search.html?query=\\*&qf=PROVIDER:DISMARC++EuropeanaConnect&view=table](http://www.europeana.eu/portal/search.html?query=*&qf=PROVIDER:DISMARC++EuropeanaConnect&view=table)

In a minority of instances content owners preferred to deliver their material to Europeana directly. The existence of the possibility of direct delivery of data undermines the role of a domain aggregator such as DISMARC. However, this has not had a negative impact upon achieving the target defined by Success Indicator 6 in the DoW (200,00 items by M30).

## 2. Details of content

### 2.1 Content:

The current total of digital items which have been harvested from the AAP and which are now available via the Europeana platform (212,190 items) or awaiting harvesting (the balance) by Europeana is **345,713** (as at October 14 2011). Audio format is 44kHz/stereo/mp3/196 kbs.

In addition to music audio items, harvested content also includes additional items related to accompanying music items, including album covers, manuscripts, demonstrations of folk dances, etc.

<b>Total providers:</b>	<b>1.103</b>
<b>Total items:</b>	<b>345.713</b>
<b>Object types:</b>	
Sounds	336.613
Image	1673
Video	735
Text	6.692
<b>Rights:</b>	
Public Domain	313.075
Rights reserved restricted access	110
CC by-nc-cd	172
CC public domain	7.000
Unknown	8.439
Rights reserved free access	16.917

## **2.2 IPR:**

Content delivered to Europeana is either in the public domain or is protected by various IPR restrictions. Where the material is in the public domain, it is marked by the Public Domain mark. Material which is IPR-protected is flagged by the relevant Europeana or Creative Commons license.

Where IPR restrictions apply to the content, content owners have delivered extracts from their original audio files. Thus contemporary audio recordings which are protected by IPR are nonetheless available via Europeana. Users can optionally follow links to access full-length, full-bandwidth versions. Extracts usually consist of between 30 seconds and 1 minute 30 seconds of audio, and the duration of the extracts is visible in the Europeana search results.

## **2.3 Hosting:**

Audio extracts are either hosted by the content provider or, where content providers have no audio server, on the DISMARC platform itself. This service is currently provided at no cost to the content owner.

## **2.4 Europeana Data Exchange Agreement:**

On the advice of the Europeana office, all audio aggregated under the EuropeanaConnect Description of work is covered by the DoW for the duration of the EuropeanaConnect project. Following the end of the project in October 2011, all current data providers will be requested to sign the Data Exchange Agreement.

So far as audio aggregated by WP6 is concerned, it seems most likely that all WP partners who have provided material from their own archives will be willing and able to sign the DEA; it also seems likely, where these partners have aggregated content from other archives for delivery to the AAP/Europeana, that these partners will be able to sign the DEA on behalf of these other institutes. One large content provider (the Orchard) is being contact directly by RBB to resolve the issue.

## **3. Technical Workflow:**

Following an archive/content provider's agreement to deliver content to the AAP for harvesting by Europeana, a test sample of data is sent to the WP6 technical partner AIT.

AIT creates a mapping in order to conform the data to the ESE/EDM schema and to identify any data which may be missing. When a test mapping has been created, the content owner is invited to give his/her response to data presented via the AAP test server.

Following the content owner's approval, the data are then uploaded and checked on the Europeana Content checker. Following a successful completion of this process, Europeana is notified that an AAP harvesting is requested.

Finally the content owners and the AAP agree on an update procedure, and the content owners are provided with tools to enable future automatic uploads/updates of their content (using FTP/OAI).

## 4. Future

Following the end of the EuropeanaConnect project in October 2011, the DISMARC Audio Aggregation Platform will continue to maintain its service for at least another 2 years. This was agreed as part of the DISMARC project contract – Rundfunk Berlin-Brandenburg as coordinator of the DISMARC project (2006-2008) agreed to maintain the service for 5 years following the end of the DISMARC EU-funded period:

*RBB will host the server and assume all server-related costs following the funded Phase. RBB commits itself to hosting the DISMARC infrastructure for at least five years after the EU-funded phase.*

Thus the DISMARC platform will continue to support Europeana until 2013.

## Appendix 1 – List of content providers

The following list details content providers who have delivered music audio to Europeana via the AAP as at 12/10/2010. NB – the list is automatically updated every 24 hours.
