

Metadata and multi- lingualism; OCLC projects and initiatives

Janifer Gatenby
Research Integration and
Standards

Trento 9th September 2009

The paper will address metadata organisation and enrichment to support multi-lingual interfaces. It will cover OCLC projects and initiatives including name and place authority data (VIAF and WorldCat identities), subject authority data (terminologies and Dewey) and parallel records in WorldCat and related data files.

WorldCat Current situation

- Parallel bibliographic records
- Name authorities - VIAF
- Dewey classification and subject authorities
- Data architecture changes
- Issue: transliteration

Parallel Bibliographic Records (language of cataloguing = eng, language of work = spa)

040 __ XXX †c XXX †d XXX

245 00 Antología de textos, la reforma y el segundo imperio (1853-1867) / †c introducción y selección de textos, Silvestre Villegas Revueltas.

260 __ México, D.F. : †b Universidad Nacional Autónoma de México, †c 2008.

300 __ xxvii, 424 p. : †b maps ; †c 18 cm.

490 1_ Biblioteca del estudiante universitario ; †v 145

440 _0 Cultura e historia mexicanas

651 _0 Mexico †x History †y 1821-1861 †v Sources.

651 _0 Mexico †x History †y European intervention, 1861-1867 †v Sources.

653 __ México †a Historia †a Siglo XVIII

700 1_ Villegas Revueltas, Silvestre.

830 _0 Biblioteca del estudiante universitario (Universidad Nacional Autónoma de México) ; †v 145.

936 PR 238572899

Up until 2003, there was a one record per resource policy. Allow libraries and users to view records described in a preferred language

142 million records, est. 8 million linguistic variant bibliographic records. 1.46 billion holdings

Language of cataloguing & of work = spa

oacr

OCLC Control Number: 238572899

040 __ XXX †b spa †c XXX

245 00 Antología de textos : †b la reforma y el segundo imperio, †f 1853-1867 / †c introducción y selección de textos Silvestre Villegas Revueltas.

260 __ México : †b UNAM, Coordinación de Humanidades, Programa Editorial, Instituto de Investigaciones Históricas, †c 2008.

300 __ xxvii, 424 p. : †b [3] h. pleg. de mapas ; †c 18 cm.

440 _0 Biblioteca del estudiante universitario. †p Cultura e historia mexicana ; †v 145

504 __ Incluye referencias bibliográficas.

651 _4 México †x Historia †y Intervención y segundo imperio

651 _0 Mexico †x History †y European intervention, 1861-1867.

700 1_ Villegas Revueltas, Silvestre, †e Colab

Spanish language of cataloguing - especially notes which can include substantial summaries and abstracts. Also Spanish subject headings

Hybrid bibliographic records

040 S3O‡b **swe** ‡c S3O

020 0333993373

020 9780333993378

043 e-uk---

100 1 Oulton, Carolyn. ‡d 1972-

245 10 Literature and religion in mid-Victorian England : ‡b from Dickens to Eliot / ‡c Carolyn Oulton.

260 __ Hounds Mills, Hampshire ‡a New York : ‡b Palgrave Macmillan, ‡c 2003.

300 221 **s.**

504 __ Includes bibliographical references and index.

650 7 Religion och litteratur ‡z England ‡x historia ‡y 1800-talet. ‡2 **sao**

650 7 Engelsk religiös litteratur ‡x historia ‡y 1800-talet. ‡2 **sao**

Slowly correcting these so that they have only one language of cataloguing
(subject headings are the exception)

Records with multi-lingual subjects

100	1	Duke, Catherine V. A.
245	1 0	Chemistry for environmental and Earth sciences /\$c Catherine V.A. Duke, Craig D. Williams.
260		Boca Raton : \$b CRC Press, \$c c2008.
300		230 p. : \$b ill. ; \$c 24 cm.
500		Includes index.
504		Includes bibliographical references and index.
650	0	Chemistry, Physical and theoretical \$x Environmental aspects \$v Textbooks.
650	0	Geochemistry \$v Textbooks.
650	0	Environmental chemistry \$v Textbooks.
650	6	Chimie physique et théorique \$v Manuels d'enseignement supérieur.
650	6	Géochimie \$v Manuels d'enseignement supérieur.
650	6	Chimie de l'environnement \$v Manuels d'enseignement supérieur.
700	1_	Williams, C. D. #q (Craig D.)

“6” = répertoire de vedettes matière (Canadian French headings)

“7” = Source specified in subfield \$2 - specifies source but not language

Records with multi-lingual subjects are not ideal – current pragmatic solution.

Records with multi-lingual subjects

- No relationship between the heading in one language and in another
- Language is not explicitly coded - just the name of the subject heading scheme
- Multi-lingual subject authorities and classifications are a better solution

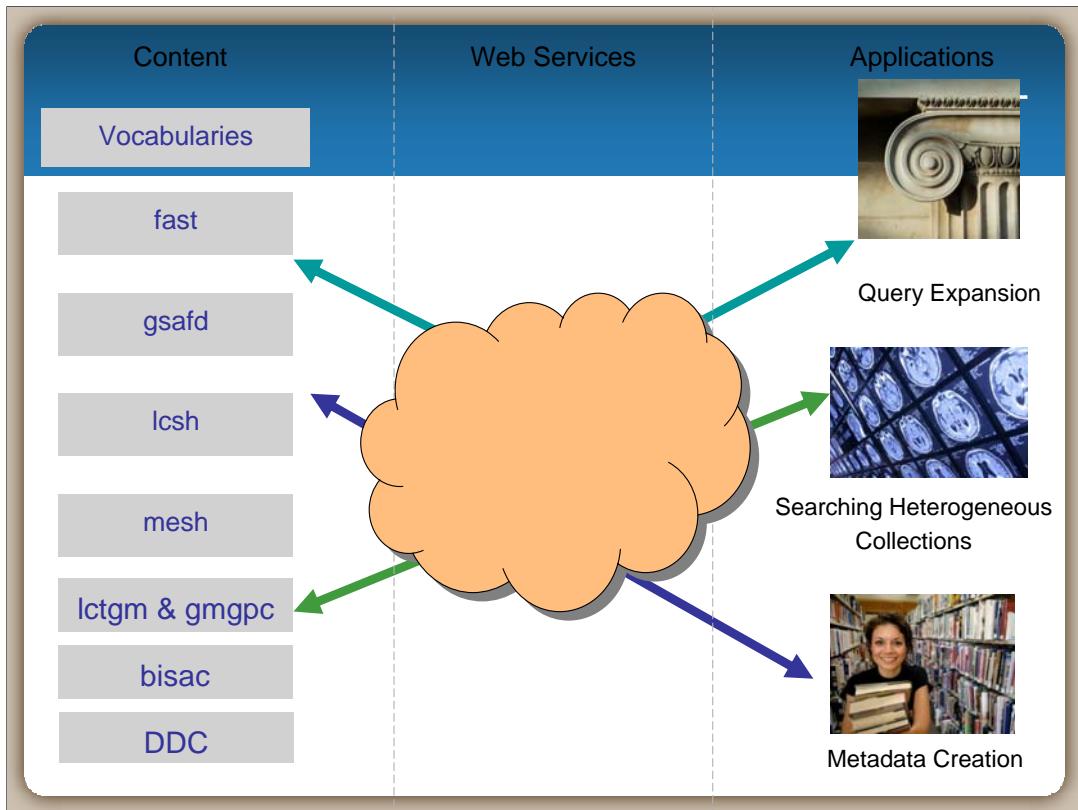

Linking translations

Jack Curtis / David Harsent

A bird's idea of flight	ALCS			OCLC

Livewire chillers - down came a spider	ALCS			OCLC	no author attribution	

We are experimenting with combining data from the rights management societies with library data. It can help show us where we can link translations – e.g. here “Le parlement des corbeaux”

There are three main components to moving vocabularies to the network level:

- Content (controlled vocabularies)
- Web services
- Applications (created by software developers internal & external to OCLC)

Dewey in a multilingual environment

- Language-independent representation
- Interoperable translations (130 languages)
- Mappings and crosswalks
- Large amount of categorized content
- Organizational support
- Worldwide user community

The screenshot shows the DeweyBrowser interface in five different languages: English, Español, Français, Deutsch, and Norsk. Each language version has a similar layout with a search bar at the top and a navigation menu below it. The navigation menu includes links for History & geography, Literature, and Technology, along with options to change the language and view the site in English, Español, Français, Deutsch, or Norsk.

We'll say a few words here about the value of one of the resources listed on the previous slide, the Dewey Decimal Classification, in a multilingual environment. The DDC offers a language-independent representation that can be used to drive discovery and access in a variety of languages and forms. Behind the language-independent representation are a rich set of terminology derived from interoperable translations, and mappings and crosswalks between the DDC and subject heading systems and other classification schemes. There is a large (and growing) amount of categorized content associated with the system and available in WorldCat and other bibliographic utilities and repositories. OCLC provides strong organizational support for the system, and the worldwide Dewey user community takes an active role in its ongoing development and use.

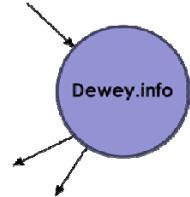

Dewey Web Services

<http://dewey.info>

Experimental space for linked DDC data

Initial linked data set: DDC Summaries in 9 languages

Features:

- Classification semantics encoded in SKOS
- Actionable URIs for every DDC class
- Representations for machines (RDF) and for humans (HTML)
- The linked data is made available under a [Creative Commons BY-NC-ND license](#) (more permissions are available [here](#))

We've just launched dewey.info, an experimental space for linked data.

The initial data set available is a linked data version of the DDC Summaries (the top three levels of the DDC) in nine languages.

The classification data is encoded in SKOS (Simple Knowledge Organization System) with actionable URIs (Uniform Resource Identifiers) for each DDC class.

The service responds to regular HTTP requests (in the form of Dewey URIs) with either a machine - (RDF) or human-readable (HTML) presentation.

Publishing parts of Dewey as linked data means that any application or resource description can establish live links into the DDC, instead of just using the Dewey number.

The linked data is available under a Creative Commons BY-NC-ND license—this license allows linking, reuse, and experimentation with the data for noncommercial purposes. We're looking forward to hearing about creative applications of the linked data.

Different name forms from different sources – French and Swedish form different from Australia, US, Israeli form.

In Progress: One page per work

Classify prototype

- Aggregates bibliographic data above the record level
- Contains all records for a work if any record has a DDC, LCC, or NLM classification number, including all language versions with or without class numbers
- Provides class number and FAST heading recommendations based on holdings
- Accessible through a user interface and as a Web service

Classify
An experimental classification web service.

Classify is powered by the Classify Web Service.

Transliteration

- Transliteration comprehension is local. Need many different schemes
 - Cilla in the UK did not accept the LC transliteration of Indic languages
- Could do transliteration “on the fly” for display BUT also require search capability which implies indexing
- Lack of MARC21 coding for the transliteration scheme is a problem
- Dutch use ISO tables with variations; tailored IBM ICU tables

Where we are heading

Holdings are delivered at manif or work level regardless of the record to which they are attached. The “appropriate record” is displayed as an assemblage

Conclusion

- Data needs work on many fronts
- OCLC data better at some things & all is evolving
 - Language of cataloguing, Dewey, VIAF
- Need to evolve in tandem, especially vocabularies and to move together on transliteration
- APIs and Linked data

Grazie
